SUMMARY

Information Technology student specializing in C, C++, SQL, Java and Data Structures. Passionate about problem-solving, software development, and applying programming skills in real-world projects. Seeking an internship to gain hands-on experience in software engineering.

SKILLS

Programming Languages	C, C++, Java (basic)
Databases	DBMS concepts using Oracle Database (SQL)
Tools	VS Code, GitHub, Windows, Oracle SQL Developer
Concepts	Data Structures Algorithms, Object-Oriented Programming (OOP)

PROJECTS

Hotel Management System using OOP and DSA

[GitHub](#)

Developed a C++ console-based system to manage hotel operations, including customer and room management, automatic room assignment, and checkouts. Implemented OOP principles and data structures (vectors, sorting, searching) with file-based persistent storage and duplicate prevention.

Employee Leave Management System using Java (Swing & JDBC)

[GitHub](#)

Developed a Java-based desktop application to manage and automate employee leave processes, including leave application, approval workflow, and record maintenance. Designed an interactive GUI using Java Swing and integrated JDBC for seamless database connectivity and persistent data storage. Implemented Object-Oriented Programming (OOP) principles to ensure modular and maintainable code.

Key Features:

Secure employee login with role-based access (Admin/Employee).

Leave application submission with approval/rejection workflow and status tracking.

Real-time leave balance calculation and validation.

Admin dashboard for managing employee records and leave history.

Database integration using JDBC for efficient CRUD operations and data persistence.

CODING PROFILES

LeetCode	Solved **400+ problems**
CodeChef	Solved **700+ problems** (2 Star)
GeeksforGeeks	Solved **100+ problems**
HackerRank	Practiced **programming fundamentals**

EDUCATION

2024 – Present	Bachelor's Degree in Information Technology , Aditya University	(CGPA: 8.79)
2024	Class XII	(97.50%)
2022	Class X	(94.83%)
